

Research

Intraprogrammatic Working Groups:

Foster collaboration and funded research growth in scientific aims of Research Programs.

Transprogrammatic Working Groups:

Foster scientific research across spectrum, focus on obtaining collaborative funded research and publications.

Disease Research Groups:

Serve as clinical/translational outlet of center's science through IITs. Conduct Stage 1 scientific reviews for new clinical protocols. Ensure marginalized populations in catchment area have access to clinical trials.

Clinical

Multidisciplinary Disease Centers:

Focus on providing comprehensive, multi-disciplinary, consistent care to patients across cancer continuum, offer latest treatment options including clinical trials. Identify clinical problems to be pursued through research.
