

| Research Logix (RLOGX)

WHAT IS RLOGX?

RLOGX is a centralized solution for maintaining critical cancer center member information including grants, publications, collaborations, and mentoring activities.

WHO SHOULD USE RLOGX?

Cancer focused researchers, clinicians, past and present trainees, and support staff can all use this system.

HOW MUCH IS RLOGX?

The system is free to all cancer center members.

Not yet a member?

Go to our website (QR code below) to review eligibility, member benefits and to apply to become a member.

WHAT CAN I DO WITH RLOGX?

RLOGX is a one-stop solution to catalog your professional activities including:

-  Update your contact information, faculty and leadership appointments, research tags and mentoring activities. This information will be used to tailor grant funding announcements, events and cancer center activities.
-  Create biosketches using the EDGE (electronic Documents Generated Easily) template which will automatically update to the current NIH version.
-  Document your training history, positions, honors and awards, community outreach activities, and lectures/presentations (all of which can be added to your biosketch using the template).
-  Invite current and past trainees to use the system to easily track their professional activities over time.

HOW CAN I GET ACCESS TO RLOGX?

You will receive an email invitation with instructions to login to the system.

Want to learn more? Please attend the monthly research program meetings to learn more about the system and to ask questions or contact Sharon.Sauter@uc.edu.
