

About the University of Cincinnati Cancer Center

At the University of Cincinnati Cancer Center, our goal is both simple and ambitious: to reduce the suffering and mortality caused by cancer. With this shared vision, the **University of Cincinnati**, **UC Health**, and **Cincinnati Children's** came together in January 2020 to form the University of Cincinnati Cancer Center. This partnership unifies cancer research under one umbrella, providing the infrastructure and collaborative opportunities necessary to build an NCI-compliant research enterprise that will make tomorrow's transformative discoveries possible.

RESEARCH PROGRAMS

Formal programs integrate meritorious research into a single trans-disciplinary research enterprise across all institutional boundaries to aid discoveries into the nature of cancer and the development of more effective approaches to prevention, diagnosis and treatment.

SHARED RESOURCES

Advancing cancer research requires access to comprehensive technologies. The Cancer Center leverages shared resources available at UC and Cincinnati Children's and invests to build and enhance cancer-specific shared resources that allow our members to advance novel research.

COMMUNITY IMPACT

Cancer research should align with community needs. The Cancer Center connects community insights with researchers and shares evidence-based findings with the community.

EDUCATION & TRAINING

The Cancer Center educates and trains current and future leaders in basic, clinical/ translational and population cancer research to ensure a pipeline of qualified professionals are ready to ultimately conquer cancer.

CROSS-INSTITUTIONAL ENDEAVOR

Cancer Research

Cancer research is conducted in labs at the University of Cincinnati and Cincinnati Children's, throughout the community via community-researcher partnerships, and in the exam room through clinical trials.

Cancer Care

Patient care is provided at UC Health and Cincinnati Children's. As the region's only academic health system, Cancer Center providers see some of the rarest forms of cancer and have access to the latest technologies and treatments.

Cancer Center Highlights

4 RESEARCH PROGRAMS

- ✓ Signaling Networks & Metabolic Pathways in Cancer Progression
- ✓ Experimental Therapeutics
- ✓ Cancer Prevention & Surveillance
- ✓ Pediatric Oncology

250+ MEMBERS

Members hold faculty appointments from ten UC Colleges and come from UC, Cincinnati Children's and UC Health.

\$38M+ DIRECT COST RESEARCH FUNDING

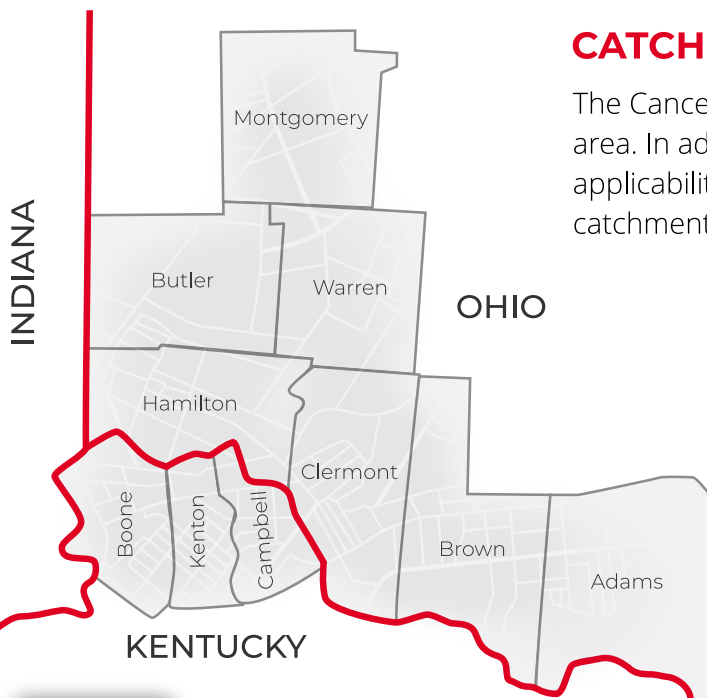

100+ CLINICAL TRIALS OPEN TO ACCRUAL

2 CANCER-SPECIFIC SHARED RESOURCES

- ① Biospecimen Shared Resource
- ② Biostatistics & Informatics Shared Resource

CATCHMENT AREA

The Cancer Center serves a specific catchment area. In addition to cancer research of broad applicability, research of particular relevance to the catchment area is conducted.
