

Visiting Professor Program – Named Lectureships

Williams Family

In the fall of 2024, the Williams family made a generous gift to establish the **Williams Family Endowed Lectureship in Colon and Rectal Surgery** at the University of Cincinnati. This lectureship was created to bring national and international experts in the field to share their knowledge, foster collaboration, and advance excellence in patient care and academic medicine.

The Williams family are long-time friends and supporters of the University of Cincinnati. Their impact extends across our institution and across our community.

One of the greatest strengths of academic medicine is our ability to bring together the best and brightest minds from across institutions to share knowledge and inspire discovery.
